

As a State and Federal Tax Payer, I object to any legislature that would lessen the potency of the Indiana Telephone Privacy Laws. Since adding my name to the "no-call" list, my daily average number of telemarketing calls, answering machine hang ups and interruptions during precious family time have dropped from as many as 8-12 calls PER DAY to zero calls.

I would view any disruption of these laws as yet another invasion of the privacy that I am Constitutionally Guaranteed in my own home. And to have this violation of my Constitutional Rights condoned by the Federal Government???? Ridiculous!

I find it absolutley absurd that the Federal Government would, by law or deed, permit or allow ANY calls to be made to my home that I have specifically tried to stop. If I require a service, subscription, new vaccum cleaner, better life/health/liability insurance, credit card or otherwise, I WILL INITIATE that contact whether it be from someone who considers me to be an "existing customer" (boy isn't that a subjective statement???) or a new provider. I do NOT need them to disrupt my home life in an attempt to sell me services that I do not want or need at the present time.

Thank you for your attention to this matter.

Regards,
Christopher R. Worsham
